

Hydro Logic Water Filter Replacement

Filter Model	Sediment Filter	Carbon Filter	KDF Carbon Filter	Reverse Osmosis Filter
Stealth RO 100 or 200 Gallon per day	Annually and also when RO filter is changed. Note: The sediment filter is a pleated paper filter and can be removed from housing and hosed off if looking dirty and then replaced.	Every 1,250 Gallons of water extracted through filter	Every 2,500 Gallons of water extracted through filter. Note KDF filter is used to remove ALL Chlorine and Chloramine molecules.	Should be replaced when output water of filter starts to rise significantly from the normal 0-25 ppm range.
Short Boy Filter	The sediment filter should be replaced when 3,000 Gallons of water have been extracted through filter	Every 3,000 Gallons of water extracted through filter	Every 6,000 Gallons of water extracted through filter. Note KDF filter is used to remove ALL Chlorine and Chloramine molecules.	N/A
Tall Boy Filter	The sediment filter should be replaced when 7,500 Gallons of water have been extracted through filter	Every 7,500 Gallons of water extracted through filter	Every 15,000 Gallons of water extracted through filter. Note KDF filter is used to remove ALL Chlorine and Chloramine molecules.	N/A
